Tech Interview Prep:

CDNs, Load Balancers, and Secure Connectivity

Section 1: Content Delivery Networks (CDNs) & Edge Performance

Section 2: Load Balancers: Traffic Distribution & Availability

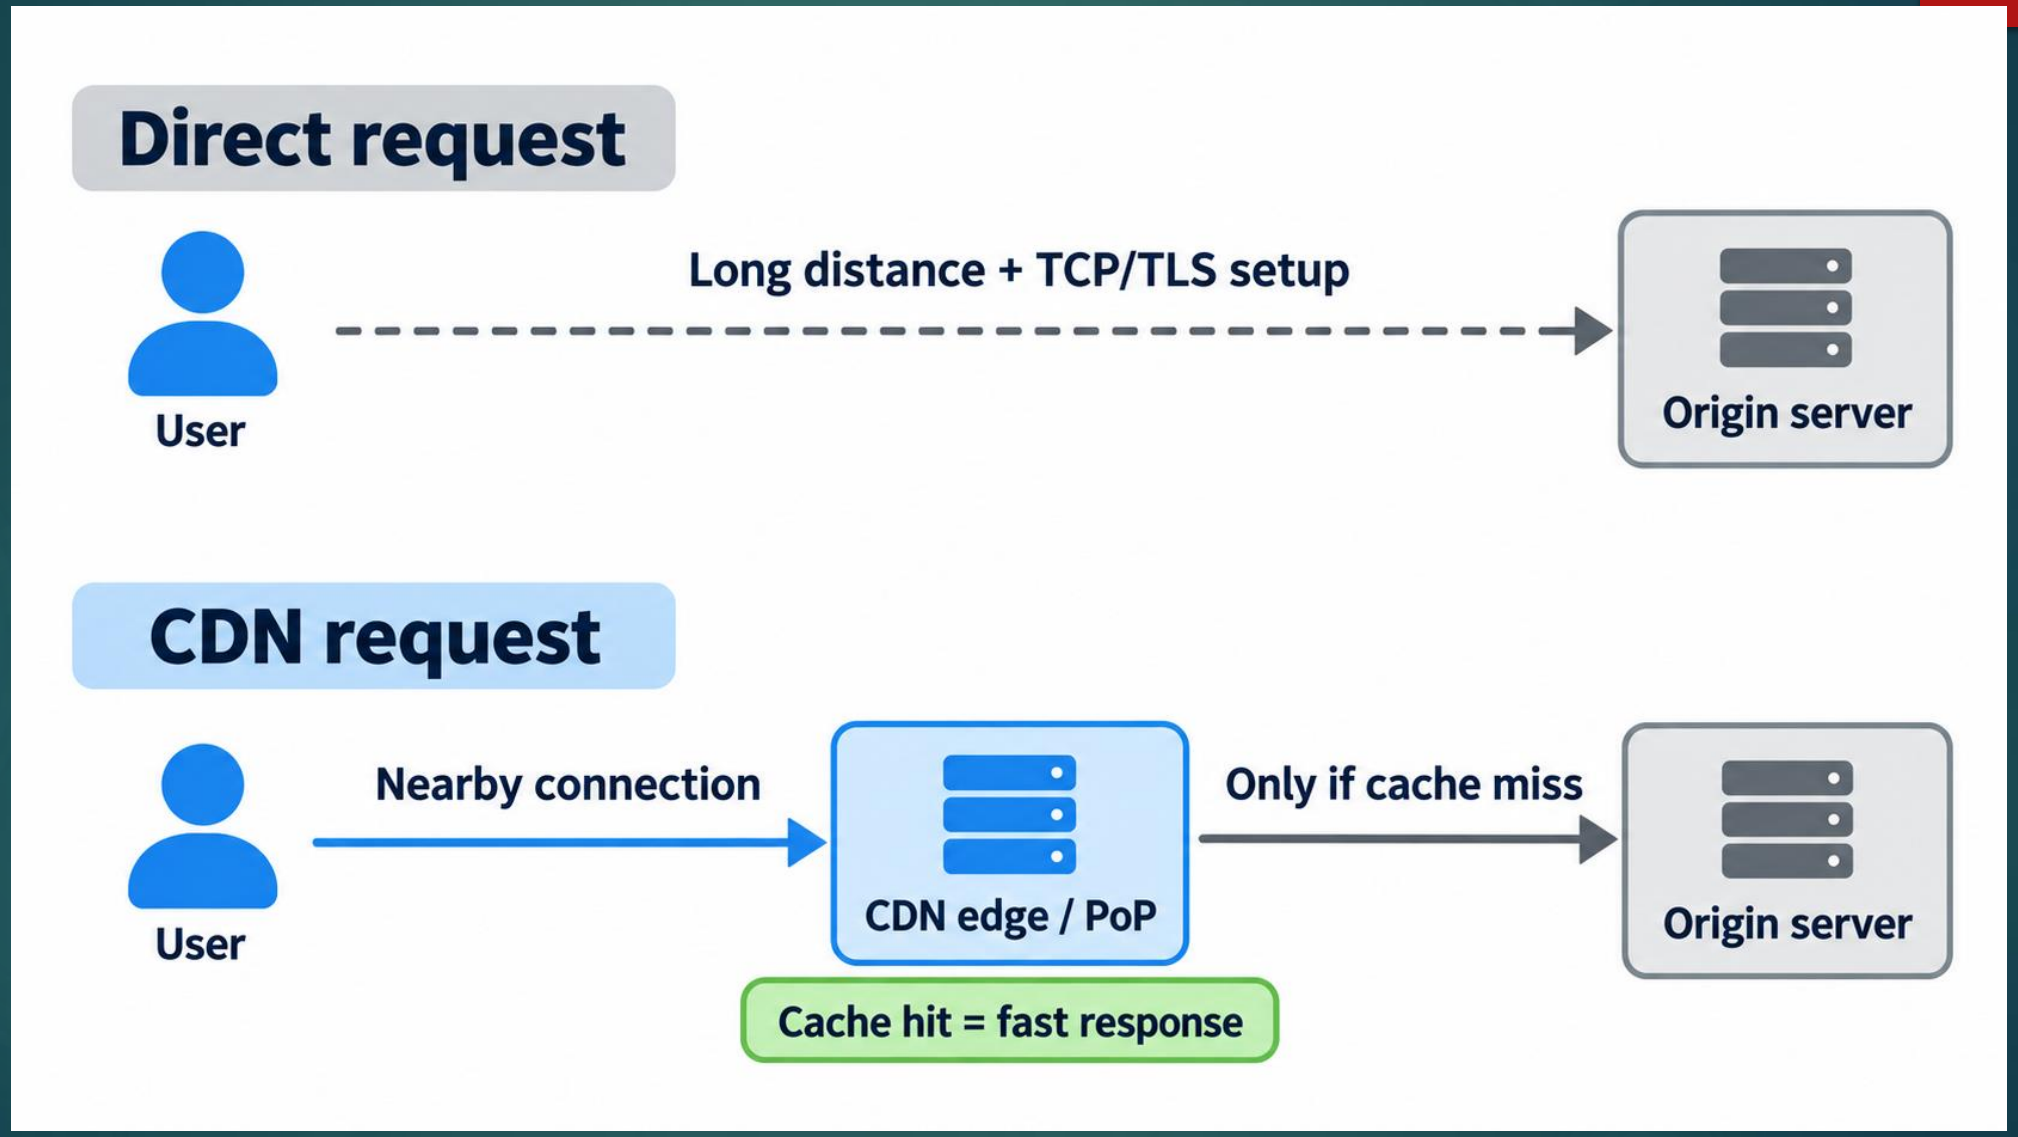

Section 3: Virtual Private Networks (VPNs) in System Architecture

Section 4: Architecture Synthesis

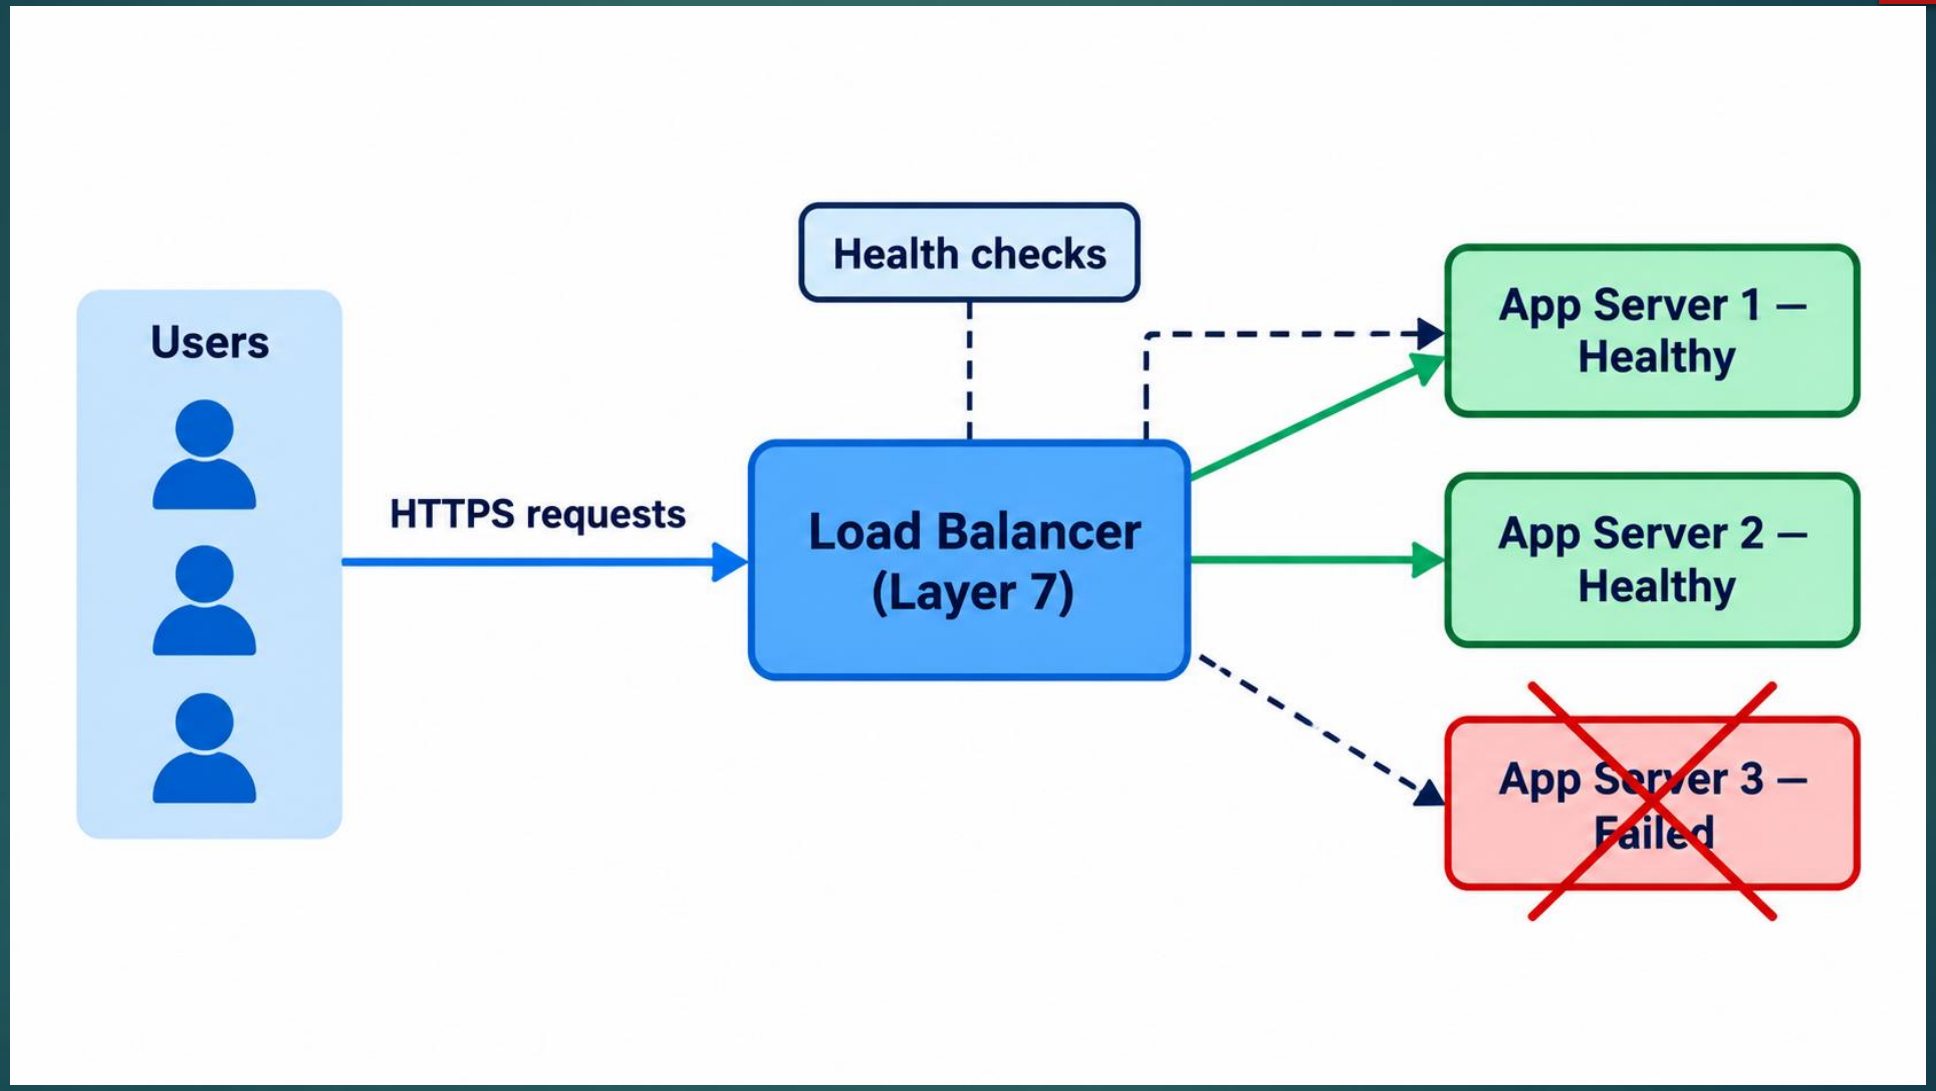

NAME: DARA SEN

CLASS: AD371 (APPLICATION ARCHITECTURE)

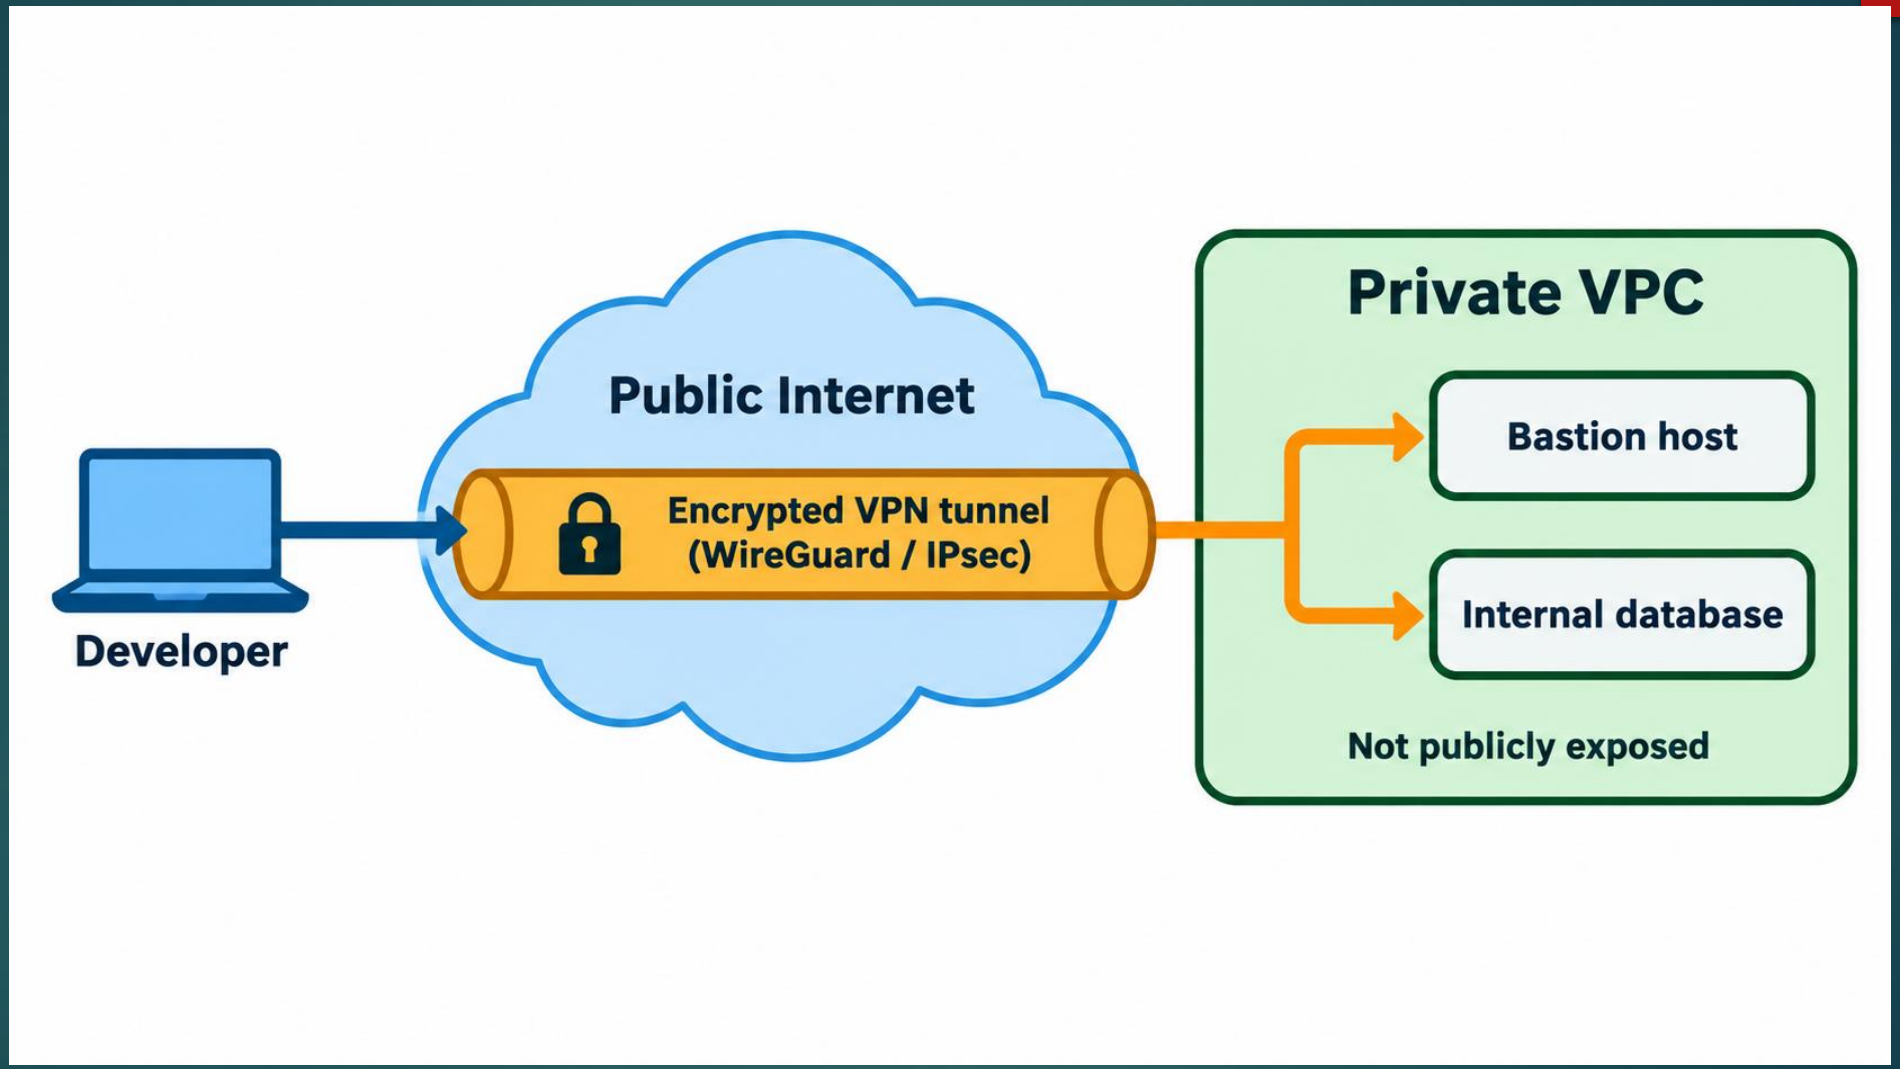

Section 1: Content Delivery Networks (CDNs) & Edge Performance

Section 2: Load Balancers: Traffic Distribution & Availability

Section 3: Virtual Private Networks (VPNs) in System Architecture

Section 4: Architecture Synthesis

- CDN – improves speed by serving content close to users.
- Load Balancer – improves reliability by distributing traffic across healthy servers.
- VPN – protects private administrative and infrastructure access.
